Overview	46
----------	----

# Memo board films

ASLAN's self-adhesive blackboard, whiteboard and ferrous films can be used to turn smooth surfaces into re-writable, dry-wipeable and even magnetically-receptive surfaces for communication.

To do this, the high-quality films are simply affixed to walls, cupboards or doors. Thanks to the virtually endless variety of options for combining ASLAN films, you can give your creativity free rein and design your own customised memoboard. Coloured boards or whiteboards can be created just as easily as memoboards with a logo or design printed on them.

Create tailor-made communication boards for offices, seminar rooms, schools, kindergartens, restaurants or hotels!

# White board films

# Ferrous films

# Black board films

Our high-quality self-adhesive blackboard films are the ideal alternative to heavy chalkboards or blackboard paint. These films can be applied to all smooth surfaces quickly and cleanly and removed again just as easily. Writing with chalk or liquid chalk pens (see table) does not leave any ghosting or shadows – this makes them the ideal medium for frequently changing messages.

**Unique:** In addition to designs in traditional black and green, a transparent chalkboard film is also available offering you complete design freedom: simply laminate over a print, coloured film or a flat piece of furniture and your custom-designed chalkboard is ready to go!

## Self-adhesive ferrous films

### Magnetically-receptive ferrous film

This anthracite coloured ferrous film makes any smooth surface suitable for placing magnets.

It can be cut easily into any imaginable shape or size and can be combined just as easily with other self-adhesive ASLAN films to create a whiteboard, blackboard or other type of memoboard.

**Ferro ASLAN FF 400**

### Printable, magnetically-receptive ferrous film

With this white, matt ferrous film containing iron, any smooth surface becomes suitable for placing magnets.

The film is digitally printable, allowing the creation of individually designed magnet boards. For instance, Clearboard ASLAN CB 90 can be added to create a customised whiteboard capable of holding magnets.

**FerroPrint ASLAN FF 450**

## Glossy whiteboard films

### Especially scratch-resistant, high-quality film for writing with whiteboard markers

These films can be applied onto any smooth surface, such as doors or walls, and even frequent rewriting creates no ghosting or shadows.

**Whiteboard ASLAN WB 995**

**Clearboard ASLAN CB 90**

**WhiteboardColour ASLAN WBC 996**

### Glossy whiteboard film for easy dry application

Whiteboard film with air release channels for easy and bubble-free dry application onto large areas.

The film is extremely scratch-resistant and can be written on any number of times with whiteboard markers – with no trace of ghosting or shadows.

**Whiteboard Dryapply ASLAN WBL 995**

## Matt whiteboard films

### Particularly high-quality films – suitable for projections

These films can be applied quickly and easily onto all smooth surfaces, flexibly creating additional media projection options.

Writing with whiteboard markers can be easily wiped off dryly using a microfibre cloth, without leaving any ghosting and shadows. A whiteboard and a projection surface in one!

**WhiteboardMatt ASLAN WB 975**

**ClearboardMatt ASLAN CB 75**

Whiteboard films

### It is your choice!

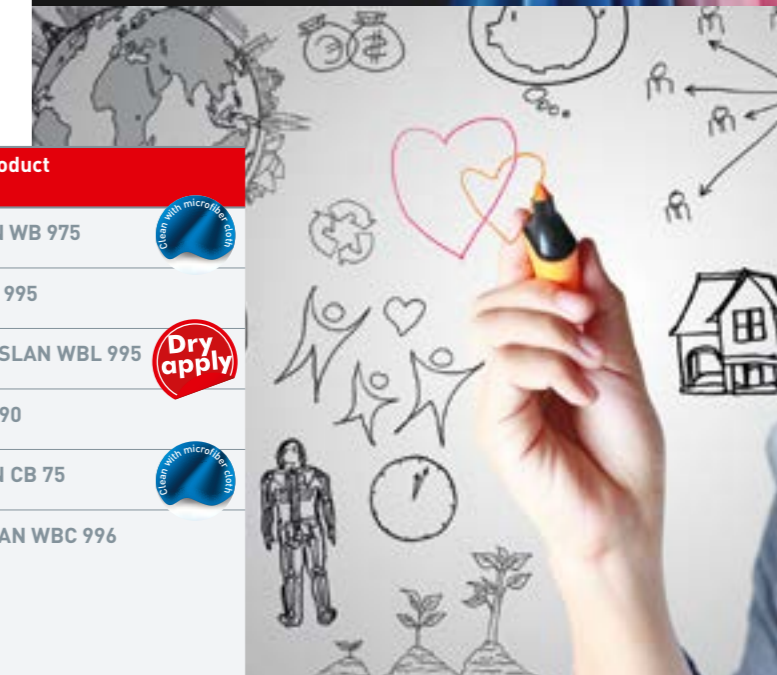

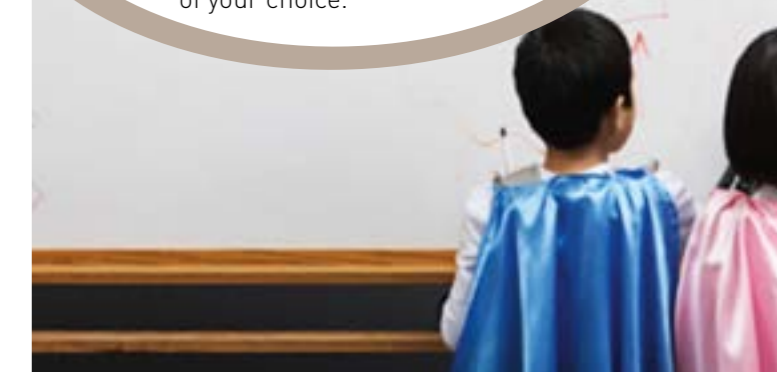

Customise your whiteboard

#### White and coloured whiteboard films:

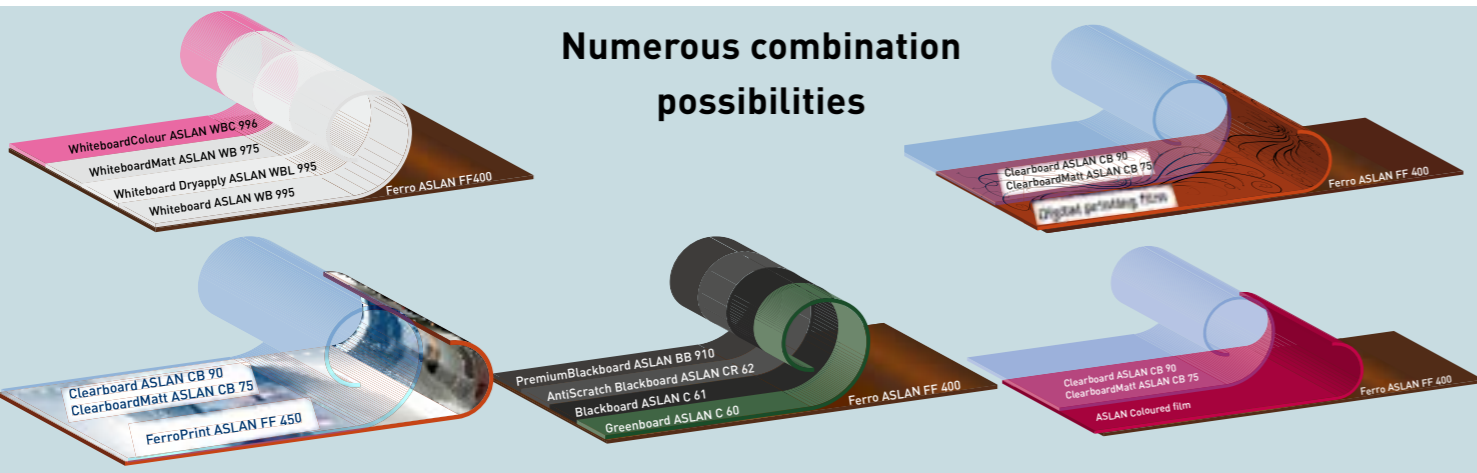

Apply to a smooth surface, and there is your whiteboard!

#### Transparent whiteboard films:

For lamination onto digital printing and coloured films or any smooth surface of your choice.

## Numerous combination possibilities

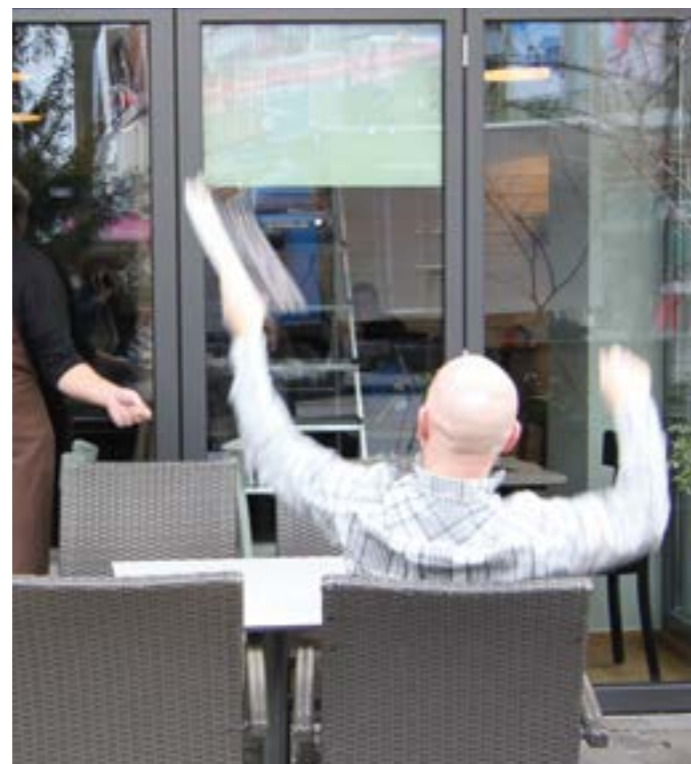

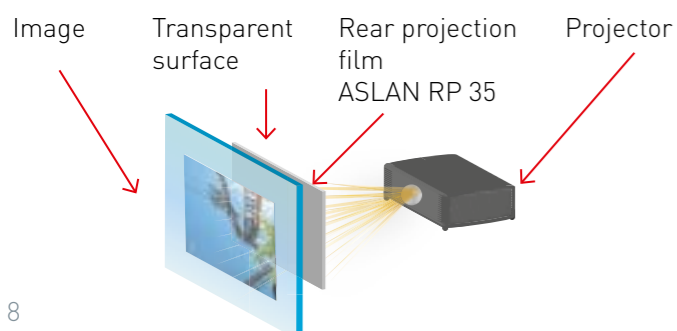

## Rear projection film

This white, translucent rear projection film is the ideal medium for striking, high-impact presentations of videos, images and presentations.

Applied onto a rigid, transparent surface, it creates a projection surface that can be operated with any standard projector.

Thanks to its uniform reproduction quality on both sides, visibility even in bright environments and particular colour brilliance with applications behind glass, the self-adhesive film is also ideal for shop windows and similar applications.

**Digital printing films**  
**With decorative designs**  
**Dry application**

## ASLAN glass decoration films

ASLAN's comprehensive range of self-adhesive glass decoration films offers a unique breadth of effects and colours for the graphics market, allowing striking and high-quality decoration both indoors and outdoors. Thanks to their ease of use, these films can be easily applied in any room. ASLAN Dryapply Technology makes application to large surfaces especially user-friendly (see page 12).

Lending glass surfaces a special look and structure, these self-adhesive films can be digitally printed and/or plotted. For safe use in public areas, many glass decoration films from ASLAN are fire safety classified according to Euroclass DIN EN 13501-1.

# Glass decoration films for easy dry application

The unique **ASLAN Dryapply Technology** makes application particularly quick and easy. A special structure with extremely fine air release channels guarantees bubble-free application without using water. This structure, combined with a special adhesive, allows easy repositioning during application without risk of damage (stress whitening). After application, the adhesive wets out and the adhesive strength increases, making the film ideal even for long-term applications.

# Glass decoration film with decorative DESIGNS

## Illustra

### Glass decoration films with appealing designs for easy dry application

Use the Illustra range of glass decoration films to give transparent surfaces a fresh and modern look in an easy way. The transparent films are printed with appealing white patterns that are scratch- and smudge-resistant. They are available in three attractive designs, "Linen", "Snow" and "Dot".

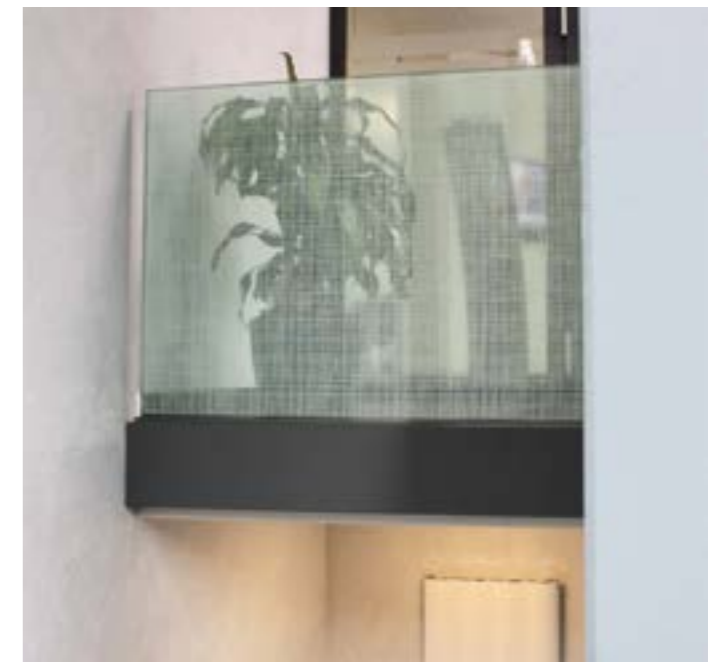

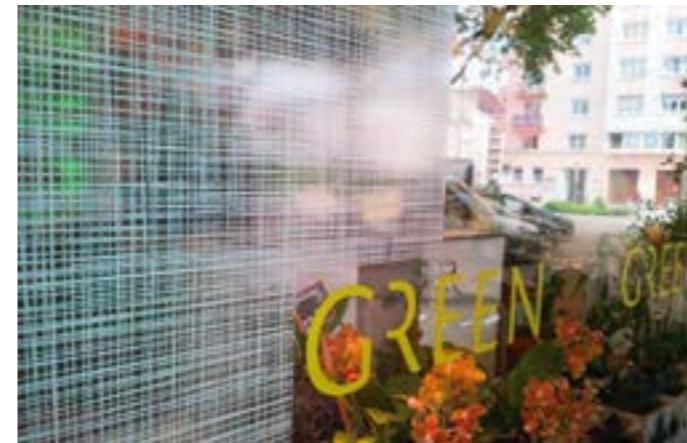

The self-adhesive films are ideal for applications requiring both excellent privacy protection and high levels of light transmission. Extremely fine air release channels allow air bubbles to be wiped out with ease, making application fast and simple.

# Metal effect films

## ASLAN metal effect films

Self-adhesive metal effect films are ideal for creating premium signs and letterings. A large variety of colours and effects, as well as a choice between printable and plottable films, offers an almost infinite number of creative applications.

Our unique metal effect films using ASLAN Dryapply technology are a particular highlight. Very fine air release channels allow easy, quick and efficient dry application, as bubbles can be easily wiped out and the film can even be repositioned during the application process. This saves considerable time and effort and ensures perfect application results for large surfaces in particular.

### Printable metal effect films

Printable with solvent, eco solvent, latex, UV-curing inks as well as screen printing

Polyester film with special, printable top coating and fine air release channels for dry application, identical effects on both sides, 50 µm, minimum outdoor durability 3 to 5 years

**PrintMetal Dryapply ASLAN CPL 22**

### Metal effect films suitable for cutting plotters

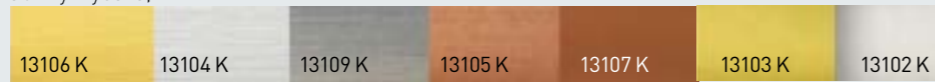

Polyester film with air release channels for easy dry application, available in gold and silver polished, identical effect on both sides, 50 µm, minimum outdoor durability 3 to 5 years

**MetalEffect Dryapply ASLAN CAL 23**

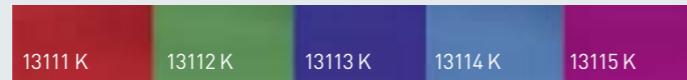

Polyester film, polished and brushed metal effects, identical effect on both sides, gold and silver polished, 50 µm, minimum outdoor durability 2 years, gold und silver polished: 3 to 5 years

**MetalEffect ASLAN CA 23**

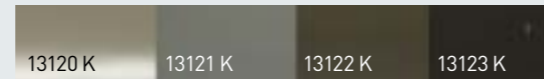

Polyester film with PVC-laminate, available in 5 colours, 140 µm, minimum outdoor durability 2 years

**MetalColour ASLAN CA 24**

Polyester film with PVC-laminate, available in 4 dark silver effects, 140 µm, minimum outdoor durability 2 years

**MetalShadow ASLAN CA 25**

**Mirror Effect AntiScratch ASLAN SE 75**

**NEW**

Highly reflective polyester film with identical mirror like effect on both sides, especially scratch-resistant surface, available in silver, 75 µm, outdoor durability 3 to 5 years

Colours may vary.

“Mirror, mirror on the wall:  
which is the fairest mirror of them all?”

### High-gloss, scratch-proof self-adhesive mirror effect film

Specially designed for the decoration of smooth surfaces, this self-adhesive mirror effect film is ideal for applications in shop fitting and exhibition stand construction, visual merchandising, interior design, and much more.

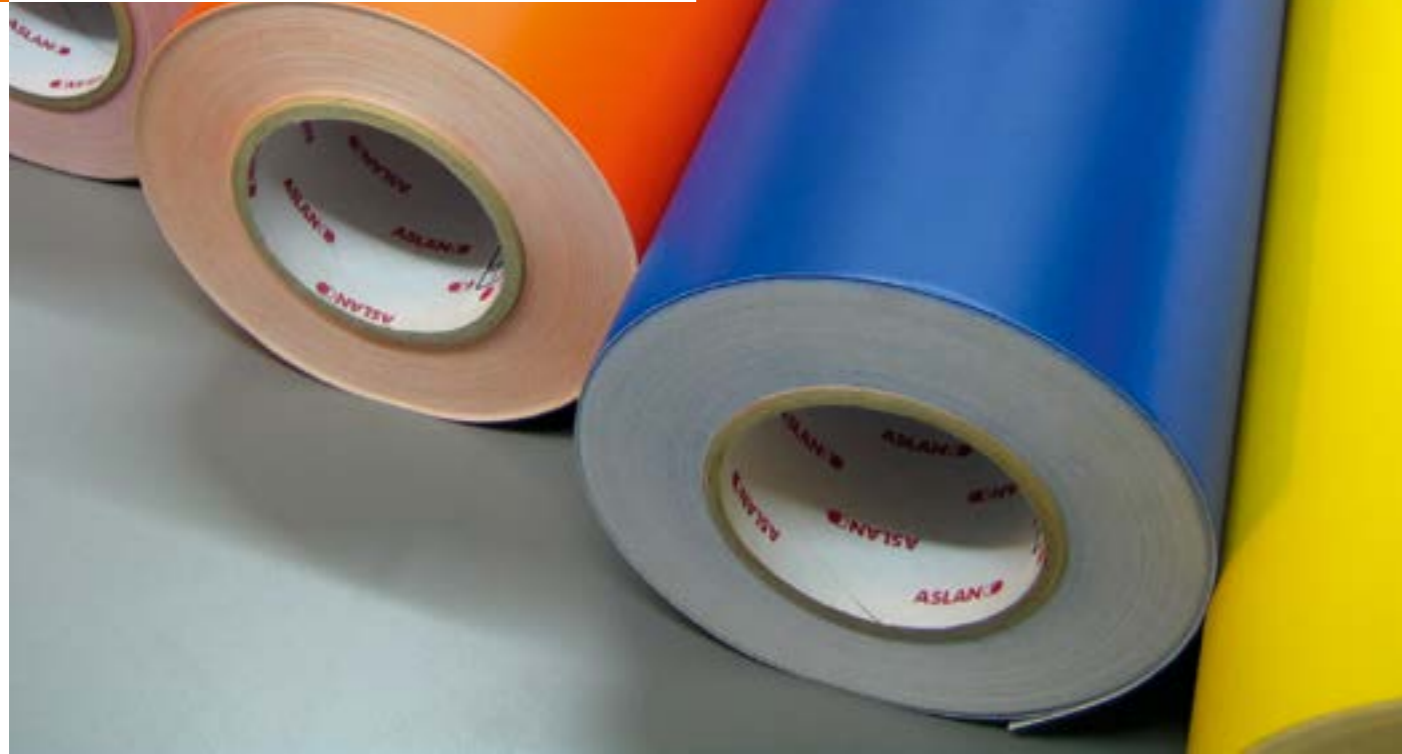

#### Product advantages

Self-adhesive polyester film offering:

- » a brilliant, high-gloss mirror effect
- » an especially scratch-proof surface:
  - Can be applied across entire surfaces without additional protection
  - Mirror effect is retained in the long term
  - Easy cleaning
- » identical mirror effects on both sides
- » excellent plotting properties

## PremiumColour ASLAN C 118 Soft

### The opaque premium film for long-term advertising

This polymeric, self-adhesive PVC-film in 36 glossy and 2 matt colours is specially designed for high-quality lettering and logo plots. It can be applied both to smooth and curved surfaces and is ideal for the long-term design of cars, public transport vehicles, glass surfaces and outdoor signs.

#### Product advantages

- Highly flexible plotter film
- Excellent adaptation to contours
- Easy and fast weeding
- High opacity
- Solvent-free adhesive

#### glossy

#### matt

Colours may vary.

## EcoColour ASLAN C 114

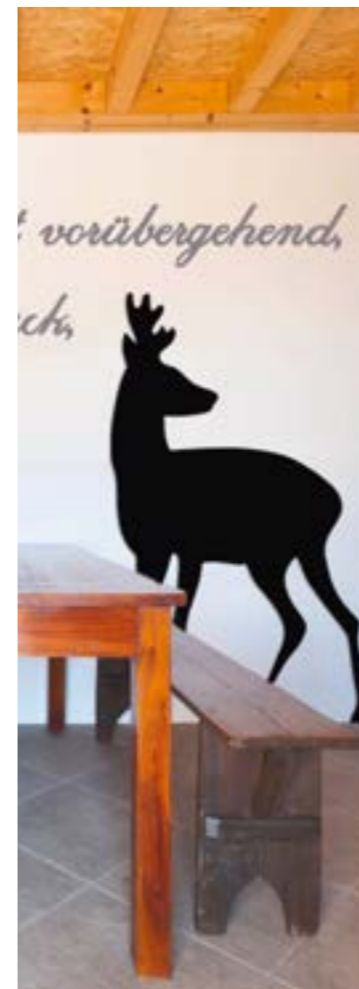

### The opaque coloured film for short- to medium-term applications

This monomeric, self-adhesive PVC-film comes in 29 glossy and 17 matt colours. Designed for lettering, logo plots and wall decals, it is ideal for the short- to medium-term design of cars, public transport vehicles, glass surfaces, signs and trade fair stands.

## WallStick ASLAN CM 100

### The matt coloured film for trade fair stands and wall decals (100 µm)

Thanks to its low-reflective surface and residue-free removal, this self-adhesive film is ideal for temporary plot applications and large surface adhesion in exhibition stand construction and shop fitting as well as for interior design and for creating wall decals.

With a roll width of 1.02 m and flame resistance in accordance with Euronorm B1, it meets the special requirements for exhibition and shop fitting work.

Its thickness of 100 µm ensures fast and easy application even during hectic trade fair times or when being handled by non-experts. High opacity makes it ideal for use on coloured surfaces.

#### Product advantages

- Ideal roll width of 1.02 m for standard trade fair panels
- Extremely high level of opacity
- Especially fast and easy application thanks to high film stability
- Removable without leaving residues
- Also suitable for outdoor lettering
- Low-reflective surface
- Flame resistant according to DIN EN 13501-1: 2010-01

**FluoColour ASLAN CL 70**

**The fluorescent film for highly visible advertising**

Self-adhesive fluorescent film, available in 3 colours, for eye-catching advertising or extremely luminous way finding systems.

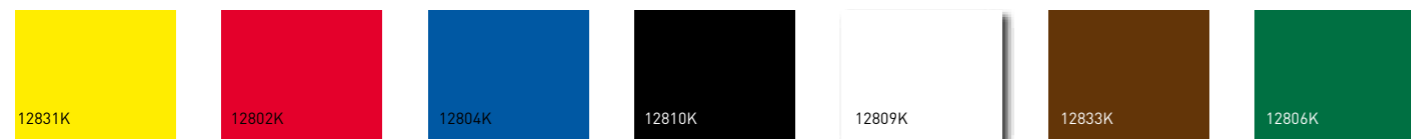

Colours may vary.

**BrickColour ASLAN CF 128 - The plottable coloured film for rough outdoor walls**

This self-adhesive film is ideal for graphic decorations on rough outdoor walls. Available in different colours, it has an outdoor durability of up to 5 years and is the perfect alternative to signs or painted letters. It is particularly suited for shop signs, way finding systems and outdoor wall decals.

Colours may vary.

**GlassColour ASLAN CT 113**

**The transparent coloured film for creative glass decoration**

These transparent coloured films allow stunning effects on glass surfaces, which are a mainstay of modern architecture and interior design. Colourful and creatively designed glass facades, conference rooms or shop windows can be easily realised.

New and improved adhesive technology further enhances the films' quality: A high level of transparency guarantees a clear view through applied films.

# Digital printing films

# Laminating films

## Digital printing films for walls and facades

For innovative and creative wall decorations, ASLAN offers high-quality digital printing films. Whether interior or exterior walls, whether short-term or long-term use – ASLAN has the right solution for your application. Thanks to the special ASLAN adhesives, the films are tailored specifically to any application you might have in mind.

## Digital printing films for floor graphics

Design floors in a whole different way and use them for eye-catching advertising! Whether for indoor or outdoor advertising, smooth or rough surfaces: ASLAN offers the right solution for every surface. For this application we provide various digital printing films that can be combined as required with slip-resistant floor graphics films. As a special advantage, the printed and laminated floor graphics are fire-rated as a complete, bonded unit.

Outdoor applications		
For rough floors (e.g. asphalt)	For short-term applications on a wide variety of rough surfaces such as pavements, entrances, paving stones and outdoor staircases, easy and fast to remove	<b>WrapTheStreet</b> ASLAN DFP 46 
For smooth floors	No discolouring of stone surfaces by ink or adhesive, removable from smooth floors in one piece and without leaving residues, for temporary floor graphics, e.g. on marble or natural stone	<b>WrapTheFloor</b> ASLAN DFP 47 
Indoor applications		
Slip-resistant floor graphics films for smooth surfaces	White, highly slip-resistant (R 13), also for barefoot walkways, directly printable, no laminating film required	<b>Print'nGo</b> ASLAN DFP 43 
	Transparent, highly slip-resistant (R 13), also for wet barefoot walkways, directly printable, no laminating film required	<b>Print'nGo</b> ASLAN DFP 44 
For smooth floors	No discolouring of stone surfaces by ink or adhesive, removable from smooth floors in one piece and without leaving residues, for temporary floor graphics, e.g. on marble or natural stone	<b>WrapTheFloor</b> ASLAN DFP 47 
For carpets	For temporary use on short-pile carpets, can be removed in one piece without leaving residues or damaging/discolouring the carpet	<b>WrapTheCarpet</b> ASLAN DFP 49

Fire rated

Even when printed and laminated, the floor films are fire-rated according to DIN EN-13501-1.

## Special advantages of the ASLAN floor graphics solutions

Floor graphics are a particularly effective way of positioning promotional messages. Due to the potential risk of slipping, however, they are subject to special safety regulations depending on the surface, usage and environment. ASLAN offers a unique range of floor graphics films developed in compliance with non-slip safety class R13. This includes the directly printable floor graphics film ASLAN Print'nGo available in white and transparent, as well as the protective laminating film Premium FloorProtect ASLAN MP 300.

These floor graphics films conform to non-slip safety class R13 according to DIN 51130 as well as the DIN 51130 standard on the slip-resistance of wet barefoot walkways (class B). On top of that, they are insurance-certified

Up to now, fire safety certificates only applied to films that had not been printed on. Once the films were printed on or laminated, they were no longer valid. ASLAN is the first manufacturer to offer a fire safety certificate for floor graphics films covering printed digital printing films in combination with floor graphics laminates according to DIN EN13501-1.

ASLAN's fire safety certified floor graphics solutions are ideal for use in public buildings, such as airports, train stations and trade fairs. The ASLAN floor graphics range includes self-adhesive films for various surfaces, such as smooth floors, rough asphalt and carpeted floors that can be combined with the corresponding laminate films of anti-slip safety classifications R9 or R13.

Our floor graphics films leave you on safe ground; both in terms of fire protection and anti-slip safety.

## Digital printing films for applications on glass

Printable with solvent, eco-solvent, latex, UV-curing inks as well as screen printing

The unique ASLAN Dryapply technology makes application especially fast and easy. A special structure with extremely fine air release channels guarantees bubble-free dry application. This structure, combined with a special adhesive, allows easy repositioning during application without risk of damage (stress whitening). After application, the adhesive strength increases, making the film ideal even for long-term applications.

## KEEPING IT CLEAR! Self-adhesive, transparent digital printing film

Decorating glass surfaces with sharply contoured cut-out motifs, without time-consuming plotting? WindowClear ASLAN DFP 18, a transparent digital printing film, makes it possible. While print results on this self-adhesive film are stunningly brilliant, the unprinted areas ensure clear visibility thanks to the film's transparency.

Even very detailed graphics and fade-out colour gradients can be quickly and easily realised – whether for offices, hotels or restaurants or the point of sale.

### Product advantages

- High transparency
- Simple and forgiving installation with a highly flexible PVC-film
- Time-saving full-coverage application: graphic elements do not need to be cut out, plotted or weeded
- Especially brilliant prints when applied behind glass – ideal for internally applied shop window designs
- Printable with solvent, eco-solvent, latex and UV-curing inks as well as screen printing inks
- Even suitable for long-term applications
- Excellent price/performance ratio

**WindowClear** ASLAN DFP 18

**UltraTack matt ASLAN DFP 08**

**UltraTack grey ASLAN DFP 07G**

**UltraTack matt grey ASLAN DFP 08G**

## Universal digital printing films for long-term applications

A very strong adhesive makes this polymeric digital printing film the ideal solution for long-term applications. The film provides a high level of adhesion, making it perfect for applications that require permanent adhesive or for challenging surfaces such as apolar surfaces, as can be found on plastic dustbins.

A double-sided, PE-coated silicone liner makes it highly resistant to moisture and heat and guarantees perfect printing results.

### Product advantages

- Polymeric digital printing film with minimum outdoor durability of 7 years
- For application temperatures from 5 °C
- Special adhesive with very high adhesive strength
- Especially suitable for challenging, uneven and/or apolar surfaces
- Ideal for application onto rough indoor walls

# Doesn't stick? Sure it does!

## Digital printing films with extra strong adhesive now available in four variants

ASLAN UltraTack digital printing film, the reliable solution for hard-to-stick surfaces, is now available in four variations. You have the choice of two matt and two glossy films, each of which is available with extra strong adhesive (transparent or grey). The advantage of the grey adhesive is that coloured and high-contrast surfaces will not show through the film.

# NEW

## Looks great from both sides!

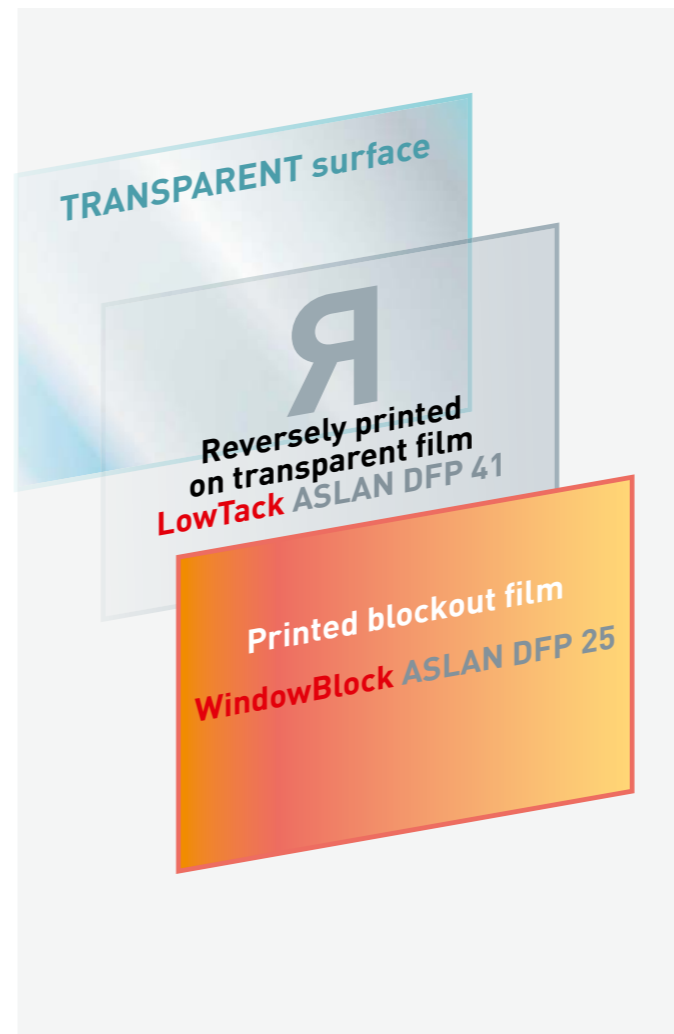

### Double-sided white blackout film

White, glossy, 180 µm

3 years minimum outdoor durability

**WindowBlock ASLAN DFP 25**

This highly opaque self-adhesive blackout film is white on both sides, making it ideal for double-sided advertising on glass surfaces. The high opacity of the blackout layer prevents digital prints from showing through.

In combination with a clear digital printing film printed with a mirror image, glass surfaces can be used for double-sided advertising that is applied from inside the glass. This offers perfect protection against vandalism.

### Product advantages

- Unique product: white on both sides with high opacity
- In combination with a clear digital printing film printed with a mirror image, advertising can be applied on both sides of glass
- The high opacity prevents prints from shining through
- Thickness of 180 µm provides for easy application
- Films can be easily removed, even after years

**WindowBlock ASLAN DFP 25**

## Highly translucent digital printing film for illuminated signs

With its silk-matt surface and an especially high translucency, this white digitally printable, self-adhesive film is ideal for backlit applications.

A structure of extremely fine air release channels permit dry application of the film. Air bubbles can be wiped out with ease, making application fast, clean and efficient.

### Ultra-translucent

White, polymeric, with air release channels for easy dry application

**Lightbox Dryapply** ASLAN DFL 20

## Floor graphics and anti-graffiti laminates

### Floor graphics laminates for outdoor and indoor applications

Matt, for protecting floor graphics, R13 classified to DIN 51130, slip resistance on wet barefoot walkways according to DIN 51097 (class B), insurance-certified, 140 µm, transparent

**Premium FloorProtect** ASLAN MP 300

Matt, for protecting floor graphics, R9 slip-resistance according to ASTM D and DIN 51130, insurance-certified, 125 µm, transparent

**Outdoor FloorProtect** ASLAN MP 326

### Floor graphics laminate for indoor applications

Matt, for protecting floor graphics, anti-slip structure, insurance-certified, 125 µm, transparent

**Indoor FloorProtect** ASLAN MP 325

### Anti-graffiti laminate

Clear, highly glossy polyester film, highly scratch-resistant, graffiti can be easily removed from the surface

**AntiGraffiti** ASLAN SL 95

Does the film do what it should?

# Stencil films

For over 30 years, ASLAN has been offering self-adhesive stencil films for painting and lacquering applications, standing out as the recognised specialist in this field.

Whether on smooth surfaces, textiles or rough walls: ASLAN has the right stencil film for you, supporting you in achieving best results in specifically your painting or lacquering application.

A specialist and market leader in self-adhesive stencil films, ASLAN offers a comprehensive portfolio covering wide-ranging applications.

## Stencil films for painting and lacquering

For tarpaulins, signs and vehicles

With high adhesion

For smooth surfaces

For uncoated textile surfaces

For facades and rough walls

#### The highly flexible self-adhesive stencil film for painting and lacquering works

The highly flexible self-adhesive stencil film for painting and lacquering. This self-adhesive stencil film is especially flexible and suitable for all lacquering and painting applications on plain and curved surfaces. It can be removed without leaving any residues.

- The world's most popular universal, highly flexible stencil film
- Tear-proof and easily removable
- For overlapping and multiple lacquering with touch-dry colours
- Ensures sharp contours, preventing paint from running underneath the film
- Suitable for high-temperature lacquering on vehicles

## WallMask ASLAN S 41 – The stencil film for rough walls and facades

This highly flexible stencil film allows easy, sharply contoured lettering on rough walls and facades, turning them into permanent advertising or decorated spaces.

### Product advantages

- Highly flexible PVC-film, fits into joints and recesses
- Adheres perfectly to all rough indoor and outdoor walls
- Ensures sharp contours, thus no paint can run underneath the film
- Removable without leaving residues
- Tear-resistant
- Suitable for multiple paint applications
- Allows quick, cost-efficient facade lettering

#### Apply mask

#### Paint

#### Remove mask

## Stencil films for sandblasting works

These self-adhesive stencil films, coordinated perfectly with various stone and glass surfaces, allow sharply contoured, relief-type structures, texts and logos or matt surface finishes. The range includes sandblasting films for a wide variety of sandblasting depths and surfaces.

The sandblasting films are highly robust and pressure-resistant and will not be damaged by the sandblasting process. Thanks to a special adhesive technology, they can be easily removed from glass, marble, granite and metals without leaving any residues.

### For very heavy duty works

- 600 µm, PVC-film, transparent
- Colour: creme

**Sandblast 600 ASLAN S 62**

### For heavy duty works

- 340 µm, PVC-film, transparent
- Colour: grey-green

**Sandblast 340 ASLAN S 63**

### For heavy duty works

- 330 µm, PVC-film, opaque
- Colour: grey

**Sandblast 330 ASLAN S 64**

### For light and medium duty works

- 230 µm, PVC-film, opaque
- Colour: white

**Sandblast 230 ASLAN S 66**

### For light and medium duty works

- 180 µm, PVC-film, transparent
- Higher resistance thanks to double-layer quality
- Colour: grey

**Sandblast 180 ASLAN S 68**

### For light duty works on glass

- 80 µm, PVC-film, transparent
- Colour: grey-green

**Sandblast 80 ASLAN S 69**

# Illuminated signs

## Diffuser film for ideal light diffusion in light boxes

In thin light boxes, the light source can be very close to the front panel. This means that the light source is visible, making the illuminated surface look uneven.

The Diffuser ASLAN D 160 film avoids this by spreading the light ideally and providing consistent illumination.

**Diffuser ASLAN D 160**

## Opaque blackout films for light boxes

With its black reverse side, this white, opaque PVC-film in double-layer quality is especially designed for blocking out areas in illuminated advertising.

Fully opaque, white film with black reverse side

**Blockout ASLAN W 15**

Fully opaque, black film with white reverse side

## Adhesion on both sides

# Double sided self-adhesive films

ASLAN's double-sided self-adhesive films can be used to turn maps, prints, posters and other non-adhesive materials into high quality self-adhesive products quickly and easily. Lined with a pH-neutral adhesive, they are suitable for a wide range of surfaces and can be applied without spray adhesives.

For easy manual application, they are equipped with release liners on both sides, one side having a grid pattern that helps for cutting the film into shape.

## Double-sided self-adhesive film with good flatness, permanent | permanent

Ideal for creating self-adhesive sheets. Highly stable, with both sides adhering permanently and reduced initial adhesion.

**Premium MountFilm ASLAN DK 1**

## Double-sided self-adhesive film, permanent | permanent

For both smooth and rough surfaces. Both sides are lined with permanent adhesive: reduced initial adhesion on one side, extra strong adhesion on the other side.

**MountFilm HighTack ASLAN DK 3**

## Double-sided self-adhesive film, permanent | removable

Ideal for all smooth surfaces. Removable adhesive on one side, permanent adhesive with reduced initial adhesion on the other side.

**MountFilm Remove ASLAN DK 4**
